

### **P17 Sheet layer 3 rows**

This machine is designed for the installation of P17 nets on melon and other cucurbit crops. It allows to unroll 3 strips of P17 of width 1m10 - 1m20 on each part of unrolling and has a reserve of 3 rolls.

It will be easy for 1 operator to put on the unwinding rolls.

For the work, 2 wheels of gauge allow to adjust the height of laying. The ground fixing is done by operators with a shovel.

For road transport, the right and left sides fold horizontally to ensure a road clearance of 2.5 m.
