

P17 6,5 m Sheet layer

- The P17 large width rewriter is a machine that can be moved on the road thanks to a hydraulically retractable rear axle.
- This same machine can be used to unwind and rewind P17s up to a maximum width of 6.50 m
- Machine pulled on 4 wheels
- The film is wrapped around the mandrel so that it can be reused later
- For the recovery phase, one person controls the rewinding movement hydraulically.
- A system allows the tarpaulin to be stretched horizontally in order to facilitate its handling over such a width

Performance table

Ref.	Packing			Weight	Performance
	Length	Width	Height		
DEEN P17	9,50	3,30	1,60	2000Kg	Minimum tractor power = 60 HP 2WD (against weight at the front if the machine is used on 2 wheels)
