

## Fruit trailer

## Fruit trailer

Our trailers are designed for the transport of fruit, either in trays or in paloxes.

They are equipped with all the accessories necessary for their operation. Tie rod, telescopic stand, protected lights, pallet support tubes. Fully metal chassis made up of a folded U-shaped frame, braced and cross-braced.

The coupling consists of a square tube drawbar with a rotating ring at the end to form the coupling head.

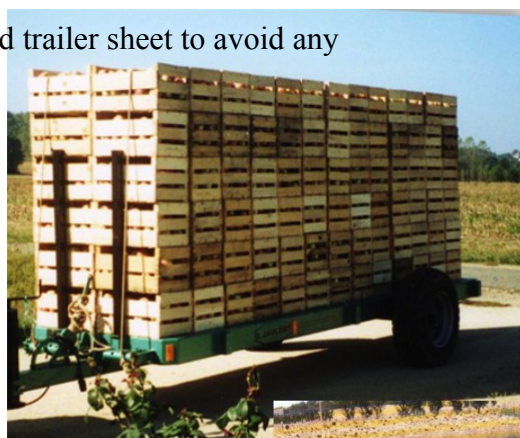

The assembly of all the metallic elements is ensured by electric welding under neutral gas. The metal assembly forming the platform is lined with a cross-braced trailer sheet to avoid any twisting of the **Option** frame:

### Roller train

Available in 1.20m x 4.07m trailer

Available in 1.20m x 5.07m trailer

Available in 1.20m x 6.07m trailer

PERFORMANCE TABLE

PERFORMANCE TABLE
