

Ridger 4 discs

This machine makes it possible to quickly create mounds of the desired size. Its V-shaped tubular frame, welded with neutral gas, offers a very high resistance. The front gauge wheels keep the machine at a constant height above the ground.

Maximum width of the mound 1.10 meters.

- Equipped with 2 discs of Ø 560 mm and 2 discs of Ø 610 mm, adjustable in angle, height and width.
- Mound forming housing with 3 flaps, adjustable by screw jack and sliding flange.
- Disc scraper.
- Adjustment of the disc opening by compass with a micrometer.
- It makes : STOPPER / STARTPER

Available in 1 and 3 rows.
