

Unwinding drip tape machine

Needle reel for round or flat drip tape T-Tape adaptable on frame for reuse of the tape
This modular, space-saving device fits onto the universal hose reel (or universal hose reel).
Easy to use, it can receive rigid tubes from 16 to 20 mm and/or flat ducts.
The empty coil is loaded between flanges, without effort. It is locked by a clamping wheel. The hydraulic motor is flanged on the rotation axis.
The winding speed is adjustable and allows a constant tension of the sheath.

Performance table

Ref.	Package			Performance
	Length	Width	Height Weight	
OPTE 1,30	0,50	1,20	50Kg	1 driver Speed = 2min to roll up 1000m of liner Rolling capacity = 1000m Tractor power = 60hp 2WD Sheath type = flat or round sheath
