

Handheld Flame Weeder with Trolley

In this version the user carries the fuel on a trolley, which can hold a 13 kg gas cylinder. This trolley allows the user to transport the portable weed killer while keeping a great stability with its two 40cm diameter wheels. It is operated by an ergonomic control handle that turns the sprayer on and off and provides all safety functions. A rechargeable battery provides 15 hours of autonomy. Its bell retracts on contact with an obstacle.

Option: - Approved 15m automatic gas hose reel,

All our devices are delivered with a gas cylinder holder, instructions for use, certificate of conformity, fluorescent safety waistcoat, battery charger, harness, pressure reducer and ergonomic adjustment key.

Performance table

Fuel	Propane gas phase
Width of treatment	20 cm
Quantity of gas	13 Kg
Feed speed	1,5 to 2,5 km/h
Operating pressure	0,8 to 1,2 bar
Empty weight	6 kg
Length of gas hose	5 or 15 m with reel
Autonomy in treatment	13 h (with 13 Kg gas bottle)
Power	11 to 17 kw
Consumption	0.8 to 1.2 Kg/hour
