

Hoeing machine

Very light, robust and very compact. It is delivered with a 3-point linkage to AFNOR Category II, so it can be used alone behind a tractor.

The width adjustment is relatively easy and fast; it allows to adapt to all types of open field vegetable growing techniques.

Available in 1 and 3 rows. On the latter version, the folding cylinders are equipped with a non-return valve in case of hose rupture.

Suitable for growing melons on plastic film, in beds
Front peeling discs

Extendable cage roller at the rear

OPTION

Fertilizer locator

Disinfection of tedder discs False

frame of vibro tine
